

The easyblist™ DB500

Take the strain and pain out of de-blistering - the DB500 is the fastest, hassle-free way to de-blister your medication.

This small desktop machine is the very latest innovation for pharmacies. It has been designed to transform the time consuming and often painful task of de-blistering medication from manufacturer packs.

Our DB500 not only reduces the risk of repetitive injuries and sore fingers from manually de-blistering medication but it's also quick to calibrate for different medication packs with no tools needed.

Designed to de-blister almost all of the medication packs used in today's pharmacy, the DB500 can de-blister up to 280 capsules or tablets per minute. It's simple to clean and maintain too.

The DB500 is completely safe and comes with a safety clamp to secure the unit to your workstation when in use. MTS provide a comprehensive DVD and instructional manual to help you use the machine with confidence. It's so straightforward to use that operators can be trained in a matter of minutes.

Code: 100-62M

“Our systems enhance the safety, security and efficiency of your pharmacy.”
